

6.0M x 2.4M Flat Pack Office Unit

Stock Code: diy-01-06

Category: Office Units

£4,700 exc.VAT

Simple Assembly | Thermal Insulated | No Rust
Windproof | Watertight | Double Glazed Windows

New generation prefab office containers! It has never been this easy and quick to build an office space. Strong wall panels, larger windows, steel frame, wooden-like flooring, surface mounted electrical installation materials; all included with your flat packed new office.

Our uniquely designed flat pack office units are suitable both for commercial or personal usage. These self-assembly and extremely cost effective flat packed office cabins are ideal to use as office, changing room, welfare and storage unit, garden shed, garden office, bike store or any function that you need.

Everything needed for the assembly of the container cabin is supplied in the pack. Thermal insulation of the walls with the polystyrene filling does reduce the heat loss.

External Length	6,000 x 2,400 mm
Internal Length	5,820 x 2,220 mm
External Height	2,560 mm
Internal Height	2,310 mm
FlatPack Dim.	6,000 x 2,400 x 500 mm
Total Weight	1,225 kg
Lower Chassis	540 kg
Roof Chassis	290 kg

Wall Panels Weight	18 kg
Window Dim.	2 pc: 970 x 1,100 mm
Window Weight	26 kg
Door Dim.	890 x 2,000 mm
Door Weight	50 kg (incl. frame)

The units are watertight, insulated and secure from theft with insulated galvanized steel sandwich panels. Unlike most of the flat pack producer companies, our flat pack range comes with all the equipment and extras that you may need even the electric kit. Electric kit which contains 32A industrial mains plug, circuit box, residual current device, over plaster sockets, plug, 2x120 cm LED armature lighting and cables comes with all our flat pack product range!

In order to take advantage of sunlight in our 6m flat pack office cabins, we use 2 pieces of (97 cm x 110 cm) uPVC double glazed opening windows.

All the external and internal surfaces of our standard flat pack product range, are made from 0.4 mm powder coated galvanized steel and 50 mm EPS insulated sandwich panels (RAL 9002) which provides protection against rust and gives a smooth finishing. We may also offer RAL 7016 for customized orders.
